

International Membership

The Medical Professional Liability (MPL) Association is the world's leading professional organization representing the MPL community. Members are international and U.S.-based MPL indemnity and insurance companies, risk retention groups, captives, trusts, and other entities.

Members insure nearly 2.5 million healthcare professionals around the world—doctors, dentists, oral surgeons, nurses and nurse practitioners, podiatrists, and other healthcare providers. MPL Association members also insure more than 3,000 hospitals and 50,000 medical facilities and group practices globally.

The Association's international members are based in six countries—Australia, Canada, England, France, Scotland, and the Netherlands— they indemnify healthcare professionals in Europe, Canada, Asia, the United States, Australia, the United Kingdom, and elsewhere.

No other organization understands the business of MPL better.

The MPL Association offers comprehensive resources for knowledge sharing, professional education and training, data analysis, networking, and risk mitigation strategies for companies to achieve success.

As a member you will have access to:

- Unique opportunities for **peer-to-peer contact and knowledge sharing** across the global MPL community.
- Opportunity to participate in **programs and events** focusing on the key functions of an insurance organization—risk management, claims, patient safety, underwriting, legal and regulatory, information technology, human resources, finance, and marketing.
- **Educational resources and training programs** designed for MPL companies, available on the MPL website and through participation in online webinars.
- Participation in **industry meetings with MPL companies globally** to discuss and address emerging trends and topics of critical interest for the healthcare sector and indemnity/insurance companies.
- **Meeting with your international colleagues** at the annual MPL Association Conference and the triennial MPL Association International Conference.
- **Online Roundtable Discussion Forums** on technology, public policy, and government relations. There is also a forum, which includes U.S.-based members, for human resources professionals.
- **The MPL Association Data Sharing Project (DSP)** is the largest independent collaborative database of MPL claims and lawsuits. MPL Association members have shared data on more than 300,000 physician and dental professional claims. Companies can use data from the DSP to study claims patterns, identify the most vulnerable areas of healthcare delivery, and to support risk management and risk financing decisions.
- **Regular bulletins and updates keeping members informed** about international trends and emerging issues—including *Inside Medical Liability Online*, digital content released bi-weekly on our website, weekly *Newsbriefs* e-newsletter, and the MPL Association website—each unique sources of information on recent, relevant topics and the latest global trends in claims, risk mitigation and adverse event prevention strategies, cross-border coverage for healthcare entities, and more.
